**Part #MD8200-17**
Product Store Link

**Quick Reference Card**
Trimble XCN2050/TMX2050
Installation & Set-up

**DigiFarm** Virtual Base Network

**elevate** SLIM

## Cable Installation

**1** Install the Beacon into the EXP-100 port expander cable

**2** **Note:** Placement of the elevate modem on the cab roof is vitally important to performance. User must extend the entire length of the cable away from the receiver as shown below.

## Receiver Set-up

**3** Home> Wrench icon> GPS Receiver > Setup (password 2009 if needed)

**4** On the GPS Receiver setup page change the Corrections to CenterPoint RTK

**5** Select xFill tab> verify settings according to screenshot below

**6** Select OK to return to Configuration page & select System> Setup

**7** Scroll down & select Port setup> Setup

**8** Select the EXP-100 serial # from the AG 815 Secondary Serial dropdown

Continue installation on back page
